ENTERPRISE SYSTEMS ARCHITECTURE | POST-SALES DELIVERY | DATA PIPELINES & ETL | TECHNICAL CONSULTING

Solutions Architect and Technical Integration Lead with over 15 years of experience delivering complex post-sales deployments, data pipelines, and enterprise systems integration. Proven record directing technical delivery lifecycles across mission-critical ERP platforms, tag management systems, and relational databases within Fortune 500 environments. Combines hands-on development depth in T-SQL, JavaScript, and custom API/ETL data pipelines with executive-level client consulting to eliminate operational bottlenecks, safeguard production cutovers, and maximize platform adoption.

CORE COMPETENCIES & TECHNICAL SKILLS

- **Systems & Platforms:** Yardi Ecosystem, SAP Concur, Longview Reporting, Microsoft Dataverse, Tealium iQ, BrowserMob API
- **Data Integration & Engineering:** ETL Pipelines, T-SQL (Stored Procedures, Triggers, Views), Relational Schema Design, Webhooks, REST APIs, Data Layer Architecture (UDL)
- **Development & Scripting:** JavaScript, Regular Expressions (Regex), Selenium Automation, Ruby, Full-Stack Internal Tools (PHP, SQL, HTML)
- **Delivery & Governance:** System Integration Testing (SIT), User Acceptance Testing (UAT), Root Cause Analysis (RCA), Pre/Post-Sales Consulting, ITIL 4 Service Management

PROFESSIONAL EXPERIENCE

Ventas, Inc. | Louisville, KY

Applications Systems Analyst: April 2025 - Present

- **Architected custom automation tools** for M&A property onboarding, replacing manual workflows across Yardi and Longview to accelerate multi-team asset ingestion from 4 hours per 10 properties to 25+ properties configured in under 30 minutes.
- **Engineered and maintained high-frequency ETL integration pipelines** across Yardi Voyager ERP, SAP Concur, Longview, and Engie utility platforms, automating multi-daily data synchronizations across an 8,000+ property portfolio.
- **Built automated ETL data validation** and schema pre-check utilities, programmatically evaluating incoming data payloads for missing or invalid fields prior to ERP ingestion to eliminate manual database lookups.
- **Authored and executed complex T-SQL scripts**, stored procedures, and triggers across an enterprise relational database spanning thousands of tables and millions of records, sustaining 99.9% uptime for core financial, banking, and ledger operations.

The Fire Place | Crestwood, KY

Division Manager (Systems & Field Solutions Lead): August 2021 – May 2024

- **Led systems onboarding and operational technology deployment** for a newly launched 5,400 sq. ft. commercial and retail facility, configuring Lightspeed POS, digital display infrastructure, and inventory schemas across hundreds of retail SKUs.
- **Orchestrated hybrid platform data workflows** across legacy on-premise relational databases (MOST) and modern SaaS field applications (Jobber), standardizing client accounts and pricing tiers to ensure zero billing leakage during post-merger integration.
- **Delivered consultative, on-site technical evaluations** and solutions delivery for complex residential and commercial mechanical installations, managing specialized field crews and maintaining a 100% successful project completion rate.

Crestwood Home & Hearth | Crestwood, KY

Founder & Systems Architect: August 2018 – August 2021

- **Architected full-lifecycle SaaS operational infrastructure** from the ground up, selecting, configuring, and deploying Jobber CRM, QuickBooks Online, and mobile payment processing to establish an automated quote-to-cash workflow.
- **Engineered custom ETL data ingestion pipelines** to map external vendor parts and pricing catalogs directly into Jobber, enabling dynamic on-site estimate generation and same-day point-of-sale invoice settlement.
- **Developed a proprietary interactive digital diagnostic reporting application**, replacing expensive niche commercial software and accelerating quote conversion times for 800+ annual field service engagements.
- **Authored standardized technical forensic reports** and inspection protocols, translating complex mechanical specifications and code standards to serve as a court-qualified expert witness in legal proceedings.
- **Directed end-to-end technical data migration** during corporate acquisition, extracting, validating, and porting relational customer history, service records, and asset databases into the acquiring firm's systems.

Tealium | San Diego, CA (Remote)

Solutions Consultant | Senior Deployment Engineer: March 2016 – August 2018

- **Directed end-to-end post-sales technical implementations** for enterprise SaaS clients (including Macy's, Texas Instruments, and Harris Teeter), managing 3 to 4 concurrent deployments delivered within 45- to 60-day onboarding cycles.
- **Architected full-stack intake applications** using PHP, SQL, and HTML to modernize customer discovery, replacing manual spreadsheets with a structured onboarding portal that accelerated initial data gathering.
- **Engineered custom JavaScript extensions**, DOM scrapers, and Regular Expressions (Regex) within Tealium iQ to extract complex variables and resolve high-impact tag conflicts, race conditions, and duplicate event firing.

- **Conducted pre-production System Integration Testing (SIT)** alongside client engineering teams, logging defects via Jira and validating real-time event payloads prior to enterprise production releases.
- **Led post-deployment technical enablement and hypercare**, validating production event firing and delivering platform training to drive rapid time-to-value and client self-sufficiency.

Neustar, Inc. | Louisville, KY

Senior Professional Services Engineer | Solutions Specialist: January 2010 - March 2016

- Delivered implementation consulting, system migrations, and Tier-3 technical support for enterprise SaaS platforms, identity registry systems, and web performance services.
- Conducted load testing, system performance diagnostics, and database query evaluations to identify architectural bottlenecks and improve site reliability.
- Formulated standard operating procedures (SOPs), API onboarding guides, and implementation documentation for Tier-1/Tier-2 support teams.
- Received the Neustar CEO Award and multiple Spot Bonus Awards for exceptional technical performance and client retention.

Kentucky Higher Education Student Loan Corporation | Louisville, KY

Technical Support Analyst | Network Technician: June 2003 - January 2010

- Delivered Tier-1 and Tier-2 systems and network infrastructure administration across desktops, servers, and VPN connections for 250+ enterprise users.
- Managed application user provisioning, access permissions, and data security protocols in strict compliance with state and organizational security standards..

EDUCATION & CERTIFICATIONS

- **Master of Business Administration (MBA) in Project Management:** Amberton University (In Progress)
- **Master of Science (MS) in Applied Information Technology:** Bellarmine University
- **Bachelor of Science (BS) in Information Technology (Honors):** University of Phoenix
- **ITIL 4 Foundation:** PeopleCert
- **Google Data Analytics Professional Certificate:** Coursera / Google

LEADERSHIP & COMMUNITY INVOLVEMENT

i.c.stars | Louisville, KY

Volunteer Technical & Career Mentor | 2025

- **Provide executive and technical mentorship to aspiring IT professionals** from underserved backgrounds, conducting coaching in data modeling, systems troubleshooting, and career progression.
- **Facilitate workshops on corporate IT navigation**, ITIL service frameworks, and structured problem-solving methodologies.
